APPLICATION AREAS

Burglar Alarm Systems are now days being used in different places like Temples, Homes, Apartments, Banks, Offices, Jewelry Shops, Factories, Private Properties.

To install a basic Burglar Alarm System:

- Choose a Control Panel as per your requirement.
- Choose the number of Recessed Mount Sensors with respect to the number of doors/windows.
- One Panic Switch for Emergency.
- Hooters required for raising alarm. Minimum 2 recommended. If one hooter is disconnected the other will instantly raise an alarm.
- Built-in battery backup for a minimum of 12 hours in case of power failure.

Add On's:

- PIR Sensor for sensing human movement inside your premises.
- Shutter Sensor for rolling shutter doors.
- Auto Dialer for receiving instant message for alarm event, while you are away from your home/shop.

Still you need help in choosing the right equipment please feel free to call us for a free demo and survey of your premises. Our professionals will study & recommend an apt design for the alarm system which will best fit your need.

We maintain very reputation in the industry and most of our business comes thru existing customer references. Our product quality and prompt after sale service support is our strength.
